ACCESS ROAD OUTSIDE THE CELL**

For more information about the landfill and solid waste issues you can visit us on the web @ www.wastetrac.org or call the landfill at (319) 296-2524 or the call the Administrator at (319) 234-8115.

This is a reminder to all haulers concerning the complete and total tarping of the openings on compactor boxes; and the closure of all doors on packer trucks; and the complete tarping of all other loads coming in to the Black Hawk County Landfill.

The openings on compactor boxes must be completely tarped with a one piece tarp or diaper that is secured to stay in place and shall not be untarped until inside the active cell litter fence containment. As of late several haulers have been using unacceptable pieces of cardboard, diapers or tarps which are too small, or bungees only.

Also, packer trucks shall close all doors to secure the load as they travel to the landfill and remain closed until they are inside the active cell litter fence containment.

Also, all other type loads and containers must be tarped 100% and secured completely and remain that way until they are inside of the active cell litter fence containment.

If these Landfill Rules & Regulations are not followed the landfill personal will assess a \$20 uncovered load charge to any load not abiding by these rules & regulations. There will be no exceptions.

It is your responsibility to inform your drivers, and the Driver's responsibility to abide by ALL the Landfill Rules & Regulations.

State Law requires all vehicles carrying materials on public right-of-ways to be covered with a tarp or otherwise secured: (STATE OF IOWA CODE 321.460)
